

Something a bit different today! I've given you the answer, but you need to think of a problem and set the question. Don't forget, you need to know how to find the answer too so I would probably test it out first!

# Problem Detective

The answer is 4340.

Write 5 word problems that use addition and/or subtraction that would give the answer 4340. Write at least one 2-step problem.

1.
